CANDIED CHERRIES MIXED WITH ARSENIC AND SENT TO A WOMAN.

Jealous Wife of a Newspaper Man Under Suspicion, Though She Denies Sending the Sweetmeats.

SAN FRANCISCO, July 8.-The woman who received a box of candled cherries, containing arsenic, on Friday, at 610 Ellis street, is Miss Florence Campbell. She and her friend. Mrs. Elsie Scheib, at whose house the basket was delivered, ate some of the confections and were made ill, but have since recovered. It is now known that the address on the basket was in the handwriting of Mrs. John Rathom, wife of a newspaper man, but there is no evidence that Mrs. Rathom sent the basket or knew anything about it. The address to Miss Campbell had been pasted on the wrapper of the box and was cut from an old envelope which Mrs. Rathom had addressed to Miss Campbell in the course of a correspon-

dence now terminated. On account of Miss Campbell, Rathom's wife had left him. He maintains that neither Miss Campbell nor Mrs. Rathom had anything to do with sending the poisoned cherries. That they were poisoned is made positive by the analysis performed at the laboratory of Thomas Price. About onefourth of the cherries contained a large quantity of arsenic, more than enough to kill a human being. The rest were harmless. Rathom, his wife and Miss Campbell made full statements yesterday to Chief Lees, and the only question which the police cannot answer is the important one, "Who sent the poisoned confections to Miss

The cherries, when unwrapped by Miss Campbell, were found to have been thrown without care into a bambo basket about 6 inches long, 3 inches wide and 21/2 inches high. It contained about three-quarters of a pound of cherries. No paper surrounded them inside the box, and they were certainly not packed in a candy store. Neither dealers. Inquiry at several of the principal town declare that the basket in this case

is not of Chinese or Japanese manufacture. Mrs. Schelb says the candy was left at her house on Thursday and kept until next day, when Miss Campbell called. Although the wrapper was stamped it is not certain that the packet came through the mails. The string had been put on first and then the address pasted over the string. From the appearance of the package it might have been several weeks wrapped up. In one or two places the string had worn quite through the piece of paper which contained

Local confectioners declare that the cherries were imported from France, and had been kept, perhaps in a jar, until they had become stale. They were not recently sold in this city.

Miss Campbell's name.

Florence M. Campbell is a girl of beauty and good breeding. Her uncle is a prominent judge in Wheeling. W. Va., from which State Miss Campbell came two years ago. She was one of a party of West Virginians who crossed the country to witness the launching of the gunboat Wheeling at the Union iron works. MILLIONS OF GOLD.

Enormous Clean-Up on Eldorado Creek-Largest Nuggets Yet Found.

TACOMA, Wash., July &-Dr. L. O. Wilcoxson, of Chicago, who has arrived here from Dawson, brings authentic news of an enormous clean-up that took place in the first half of June, several pack trains having arrived at Dawson from Bonanza, Eldorado, Hunker and Sulphur creeks, each bringing in \$500,000 to \$1,500,000 in dust. The big pack train made several trips from Professor Lippey's claim on Eldorado.

largest nuggets yet found in the Klondike were discovered during the clean up. One from Claim 4, below on the Bonanza, weighed sixty and one-half ounces and was pregnated with quartz, was found on Gold Hill. It weighed over 106 ounces and is valued at \$1,804. Steamers were leaving Dawson almost daily for St. Michael, bearing rich Klondikers and their dust. The steamer Robert Kerr, leaving Dawson on June 20, carried over \$3,000,000. He thinks that \$5,000,000 and their owners will arrive Coming out Wilcoxson learned of two important new discoveries, one on Thirtymile river, where \$2 per pan is found, and the other on Big Salmon, where the win-ter's dumps averaged \$38 a day for each man. Wilcoxson goes home, but will return north in August.

#### TWO NEW RAPID-FIRE GUNS.

One for Protection of Mine Fields and the Other for the Navy.

NEW YORK, July 8.-A new rapid-fire gun, designed for the protection of the mine fields, and a novel semi-automatic sixpounder for the navy, has been successfully tested on the proving grounds of the Briggs-Seabury Gun and Ammunition Company, at Derby, Conn. These guns were built for the army and navy, respectively, under contracts awarded at the beginning of the war with Spain, and will probably play an important part in the plan and scope of national defense. The army gun steamer Campania which reached her pier is a six-pounder of the Briggs type, and is mounted on a parapet carriage, which admits of the piece being fired with the same rapidity as upon a naval mount. While it can be easily transported from place to place-in fact, the new weapon is a combination of a field and coast defense gunits use will be principally to protect the torpedoes in the harbors by throwing such that no small boat could live within its zone 40 per cent. of our through business. We that no small boat could live within its zone had to have it to prevent some other road of fire. The gun and carriage rest upon a parapet of the fort and are held rigidly in position by means of a V-shaped steel anchorage, which is worked under the center of the axle. Should it be desired to concentrate the fire on any particular point, the anchorage is unhooked and the carriage rolled away to any point of the beach. The semi-automatic gun is also a six-pounder, and is the first completed of fifty-one for the navy. It is expected to work a revolu-tion in rapid-fire guns, for with it a speed of sixty shots per minute was attained today, which is twice the record by the sixpounder when worked by hand. Another mportant feature is that it reduces the crew of a six-pounder from four to two men, one of whom throws in fixed ammunition as a person throws coal into a furnace, while the other fires as the breech block closes automatically.

#### SUICIDE OF S. S. PAGUE

Former Officer Who Tried to Kill Col. Crofton at Fort Sheridan.

CHICAGO, July 8 .- Samuel S. Pague, who. when stationed at Fort Sheridan as lieutenant of Company F. Fifteenth United States Infantry, fired three shots at Colonel Crofton, and who was dismissed from the army on the finding of a court-martial, died in the office of a Clark-street lodging house to-day under circumstances which indicate suicide. The former officer spent the night in a room at the house, and, early to-day. entered the office and threw himself wearily into a chair. A half hour later the clerk found his dead body in the chair and an empty chloral bottle in his pocket. The dead man left no letters, which indicated that he had premeditated self-destruction

The attempt to kill Colonel Crofton and subsequent trial of Pague attracted widespread interest. Pague was jealous of Col. Crofton, alleging that the latter's attentions to Mrs. Pague were too pronounced. On Oct. 3, 1895, Pague, heated with wine, fired bullets at the colonel. Two bullets through the latter's overcoat, the striking the ground. Mrs. Pague rushed to her husband and seized his arm He was then arrested. On the dead man's person were found a number of papers, one mmending him for the position of paymaster general of the army. With his dismissal from the army Pague's

#### ECZEMA ON NOSE

For 9 Years Cured by CUTICURA In a Short Time After Five Doctors Failed.

I have suffered for nine years with sores in my nose. I consulted with a first-class doctor, and he told me it was fever sore that would soon page away. I had four doctors treat me for nose tronble, but without seeming to do any good. My trouble was so bad my husband decided that I should go to N. Y. City and get treated. The best doctor in the city for nose, eye, and throat told me I had eczema in the worst form, and I must stay and get treated three times a week. I did not seem to get any relief, so my husband sent for me to come home. While I was home I decided to try CUTICURA REMEDIES. I got CUTICURA SOAP, CUTICURA (cintment), and CUTICURA RESOLVENT, and I was surprised to and it was but a short time when my nose was all well. Mrs. C. S. VAN POSTRAND, April 25, 1898. Point o' Woods, Bay Shore, L. L.

From a very small girl I had a breaking out on my head every spring, which would become a solid scab. Finally my father procured a box of CUTICURA (ointment), a cake of CUTICURA BOAP. and a bottle of CUTICURA RESOLVENT. I have never been troubled with the disease since. NORAH B. HANNA.

CUTICURA Begins with the Blood and Ends with The Skin and Scale.

That is to say it purifies the blood and circulating fluids of HUMOR GERMS, and thus removes he cause, while warm baths with CUTICUM the cause, while warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA (ointment), greatest of emolitent skin cures, cleaned the skin and scalp of crusts and scales, allay itching, burning, and inflammation, and soothe and heal. Thus are speedily, permanently, and economically cured the most torturing, disfiguring and humiliating humors of the skin, scalp, and blood, with loss of hair, when the best physicians and all other remedies fail.
